

Psalm 151

An example psalm

Stanford

9. The half letter size does not include dynamics :
Because there is no room for them.
 10. For compatibility they should be left in :
so you can use the same text with multiple sizes.
 11. If a verse is very long and goes on and on forever it will create
its own break in the middle of a line :
And sometimes you may want a
vertical space after a verse.
 12. Sometimes you may want to pause * in the middle of a
verse :
Or to specify the number of syllables using dots.
 13. If a verse is very long and goes on and on forever
you may want to break in the middle of a line :
And sometimes you may want a vertical space after a
verse.
- Verse numbers are automatic :
But sometimes you may not want them
For example in the Gloria :
At the end of a psalm.
